

Curraduff Lower Solar Farm

Capacity

5 MW

Project Type

Solar - in planning

Planning Grant Date

23 April 2019

Site Location

(52.205, -9.024)

Site Overview

Located in Co. Cork, Curraduff Lower Solar Farm is being developed within the townland of Curraduff. The site is approximately 1.8 km from Newmarket which lies northeast of the site. The site itself is of moderate grade agricultural value, with improved grassland used for the grazing of livestock. The Solar Farm will be situated on shallow sloping agricultural land at an approximate elevation of 190-220m AOD.

A planning appeal for this site is currently with An Bord Pleanála. The current planning application includes for include one single storey electrical substation building, electrical transformer/inverter station modules, solar PV panels ground mounted on steel support structures, access roads, fencing and associated electrical cabling, ducting and ancillary infrastructure.

The site is proximate to existing electrical infrastructure and the current grid connection point is projected as the Glenlara 110kV or Newmarket 38kV substation, both of which are local to the site.

This solar farm is being developed by Highfield Energy as part of our broader commitment to a sustainable future.

About Highfield Energy

Highfield Energy develops, constructs, owns and operates electricity generation projects with a particular focus on renewables. Possessing significant technical and market expertise Highfield Energy optimises potential developments in order to provide the highest quality results. Highfield Energy has a proven track record of working in partnership with developers, landowners and wider project stakeholders to promote sustainable energy sources. We currently have over 1 GW of utility-scale wind, solar photovoltaic (PV) and energy storage projects within our portfolio.
