

Ashford Wind Farm

Capacity

12.3 MW

Project Type

Wind - In Construction

Planning Grant Date

17 April 2013

Site Location

(52.34, -9.042)

Site Overview

Located in Co. Limerick, Ashford Wind Farm is being constructed within the townlands of Glenduff, Darrery and Coolnanoglah. The site is proximate to the village of Ashford which lies northwest of the site and is located on an area of pasture on a ridge separating Glenduff from the northern lowland plain of Limerick. The land is mostly improved grassland with some scrub on the very steep northern side. At its high point, to the west, it is close to 350 metres in elevation.

Planning permission for this site was granted by An Bord Pleanala in 2013 and includes for 25 No. Conditions.

The development consists of 6 number MM92 wind turbine generators and crane hardstandings for each turbine, the construction of a meteorological mast, electrical substation, underground electrical cabling, access tracks, borrow pit, temporary construction compound and ancillary services.

This wind farm is being developed by Highfield Energy as part of our broader commitment to a sustainable future.

About Highfield Energy

Highfield Energy develops, constructs, owns and operates electricity generation projects with a particular focus on renewables. Possessing significant technical and market expertise Highfield Energy optimises potential developments in order to provide the highest quality results. Highfield Energy has a proven track record of working in partnership with developers, landowners and wider project stakeholders to promote sustainable energy sources. We currently have over 1 GW of utility-scale wind, solar photovoltaic (PV) and energy storage projects within our portfolio.
