

Tomfarney North Solar Farm

Capacity

12 MW

Project Type

Solar - Planning secured

Planning Grant Date

22 December 2016

Site Location

(52.435, -6.738)

Site Overview

Located in Co. Wexford, Tomfarney North Solar Farm is being developed within the townlands of Tomfarney. The site is approximately 2 km from Clonroche which lies northeast of the site. The site itself is a working farm of moderate grade agricultural value, generally made up of tillage land. The Solar Farm will be situated on shallow sloping agricultural land currently used for arable farming at an approximate elevation of 80-121m AOD.

Planning permission for this site was granted by An Bord Pleanála in 2016 and includes for 20 No. Conditions. The grant includes for include one single storey electrical substation building, electrical transformer/inverter station modules, solar PV panels ground mounted on steel support structures, access roads, fencing and associated electrical cabling, ducting and ancillary infrastructure.

The site is proximate to existing electrical infrastructure and the current grid connection point is projected as the Clonroche 38kV substation local to the site.

This solar farm is being developed by Highfield Energy as part of our broader commitment to a sustainable future.

About Highfield Energy

Highfield Energy develops, constructs, owns and operates electricity generation projects with a particular focus on renewables. Possessing significant technical and market expertise Highfield Energy optimises potential developments in order to provide the highest quality results. Highfield Energy has a proven track record of working in partnership with developers, landowners and wider project stakeholders to promote sustainable energy sources. We currently have over 1 GW of utility-scale wind, solar photovoltaic (PV) and energy storage projects within our portfolio.
