

Derrynahinch Solar Farm

Capacity

5 MW

Project Type

Solar - Planning secured

Planning Grant Date

11 April 2018

Site Location

(52.48, -7.189)

Site Overview

Located in Co. Kilkenny, Derrynahinch Solar Farm is being developed within the townland of Derrynahinch. The site is approximately 1.5km from Ballyhale which lies southwest of the site. The site itself is a working farm of moderate grade agricultural value, with tillage land and improved grassland for the grazing of stock. There are existing tracks on the site to be used for access to areas of the development. The Solar Farm will be situated on shallow sloping agricultural land currently used for arable farming at an approximate elevation of 60-75m AOD.

Planning permission for this site was granted by An Bord Pleanála in 2018 and includes for 12 No. Conditions. The grant includes for include one single storey electrical substation building, electrical transformer/inverter station modules, solar PV panels ground mounted on steel support structures, access roads, fencing and associated electrical cabling, ducting and ancillary infrastructure.

The site is proximate to existing electrical infrastructure and the current grid connection point is projected as the Ballyhale 38kV substation local to the site.

This solar farm is being developed by Highfield Energy as part of our broader commitment to a sustainable future.

About Highfield Energy

Highfield Energy develops, constructs, owns and operates electricity generation projects with a particular focus on renewables. Possessing significant technical and market expertise Highfield Energy optimises potential developments in order to provide the highest quality results. Highfield Energy has a proven track record of working in partnership with developers, landowners and wider project stakeholders to promote sustainable energy sources. We currently have over 1 GW of utility-scale wind, solar photovoltaic (PV) and energy storage projects within our portfolio.
